AMERICAN DESIGNS. A few numbers back we stated that the Fenian movement was a lever wielded Hor certain purposes by Scoretary Seward. Every telegram we receive on the subject only gives substance to our assertion. It is now quite evident from the agitation in Canada, as well as in Ireland, that the flourishes of the brotherhood are not empty bravado, but indications of a concerted scheme. What that scheme may ultimately turn out to bewhether a deep laid design to wrest Ireland from British domination, or force Canada into annexation, or whether it is merely a something to be held by the author ities at Washington in terrorem ove heads of Palmerston or Russell-i would be difficult to do more than sur mise; but we think there is no much difficulty in coming to the conclusion that the whole affair is an American move ment, receiving its inspiration from the Gov. ernment of the United States, and intended in some way or other to inflict an injury upon England. The latest telegrams show that disturbances were anticipated in Canada, and that the authorities had been induced to adopt the most active measures to suppres an outbreak if it should take place. stories that are circulated in reference to the movement are in all probability exaggerated, and intended to deceive, but whether they are or not, we cannot, among other things, shut our eyes to the exertions the United States have been making and are making to inducthe North American provinces to abandon the British flag for the Stars and Stripes. Everything that the American press can do to show to Canada her danger so long as she remains under the protection of England, and the grand future that opens out to her in annexation with the United States-has been done. The very last number of the New York Herald exhibits one of the most remarkable productions that have ever appeared on the subject in any newspaper. It is a repor occupying considerably over two pages, and forms a most marked contrast in its matter and style to the ordinary effusions which appear in the Herald. The writer has not only discussed the federation scheme and taken up all the arguments in favor and against annex ation, but has gone minutely into every detail of the present and future military strength of Canada. He tells us to a man what troops are in every town and city in the country, the nature of the fortifications at present existing and those that are intended to be erected. What Great Britain is secretly doing at Montreal and Quebec, what its intentions are, and how Canada is going to be affected commer-cially and politically by her adherence or non-adherence to the British flag. Of course there is much plausibility and a great deal of sophistry in the arguments adduced, but we cannot do better in this critical time than to place the most important parts of the document before our readers. It is a key to many of the incidents that have recently happened, and may turn even Gen. Grant's

pling the resources, retarding the development and destroying the unity of the country, he would wonder at the folly of man in thus rejecting and perverting the best gifts of the Creator. But how greatly would his astonishment be augmented when he learned that the people of the two nations are of a conmon origin, speaking the same language and governed by the same laws, and that they are kept apart in a state of semi-hostility only by the jealousies, intrigues, and fancied necessities of foreign Powers in another quarter of the globe, thousands of miles away." There is a humanity as well as an expediency, the writer contends, in consolidating

late Canadian visit into something more than

a pleasure trip. The report starts off with

the following prefatory sentence :- " It will

be the object of this report to inquire whether

the people of the United States ought or

ought not at this time to consolidate Canada

if they can, forcibly if they must." The writer then goes on to state:—"If a stranger

lakes and rivers which nature has showered

upon us as her richest favors, runs an imagin-

ary line dividing the vast territory into two

separate and distinct nationalities, with di-

verse and sometimes hostile interests, crip-

to our history, with a map of the continent before his eyes, should be told that from the Northwestern wilderness along the

with the Republic as one nation, 'peaceably

at once the European races upon the American continent under one form of Government. But the expediency is evidently uppermost " Torday the United States rest contented in the position of a housekeeper, who bolts and bars the front doors and windows of his house and leaves the rear unguarded and open to the entrance of the burglar." The danger is thus more clearly explained-"a glance at the map is sufficient to show how readily, with the navigation of the St. Lawrence from the ocean to Lake Ontario at her command, England could devastate the Northern cities and lands of our own State. As will be shown more particularly clsewhere in this report, England is even now engaged in closing the St. Lawrence and ren; dering Quebec impregnable by works of enormous strength, to be erected on Point Levi. She is at this moment building gunboats at Quebec, at Kingston, and probably at other points, in violation of the existing treaty. She is laying in enormous stores of guns, of field arms and of ammunition, converting Canada into a vast European arsenal. She is urging the erection of defences at Montreal, Kingston and other points, and is prepared to proceed with some of the most important of the works at her own cost, if the Province does not speedily undertake them. She is urging the confederation of all the provinces with the purpose of building up in Canada a

strong military power hostile to the United States. Is it prudent and politic for our government to remain inactive and suffer this aggressive policy of England to be carried out until we find a powerful enemy firmly established upon our rear and flank." THE DAILY BRITISH COLONIST After attempting to show at some length the evil to the United States in both peace and

war of Canada in her present position the writer goes on to say that the British province is in a transient state, and that she must become speedily "either a confederated Wednesday" military power-a fortress and arsenal for Great Britain on this side of the Atlanticor she must stand forth as a republic, independent or consolidated with the United States." Confederation the writer does not believe will succeed, and a quotation is made rom a speech of the late Canadian premier Sir E. Tache, in which it is asserted that " case Confederation is not effected, if no foroibly annexed to the United States, Canada will be placed upon an inclined plane which will carry her there insensibly." Elaborate argument; are adduced to show that Condederation, if it does happen, will not keep away the real danger which threatens the North American provinces, nor promote the prosperity of the country in anything like the degree which would accrue from union with the States; and it is also endeavored to be proved that Great Britain will not, unless a show of compulsion is used, give up the colonics north of the States. This compulsion is to be done in the very manner which the Fenians seem to be taking-a kind of irreponsible effort that may at any moment lead to hostilities. Our space will not admit of a further allusion to the subject to-day, but we

Mr. PHELPS' BENEFIT-To-Light that in dustrious and versatile actor and stage manager, Mr. A. R. Phelps, will take his benefit. The bill is a comprehensive and highly attractive one, comprising the pretty comedy of the Wonderful Woman with Fanny pairing this statement with the two papers must come to the conclusion that the moving spirit of the Chronicle must either be a very facetious or else a very unprincipled fellow. Let them however judge for themselves, when we tell them that having recently had occasion to print the Chronicle on our power. Morgan Phelps as Hortense and Mr. Phelps as the Cobbler. The attractive petite comedy of Pertection, or the Maid of Munster in which two well known amateurs will appear. The first act of "Black Eyed Susan," with Mr. Phelps as William and Mrs. Phelps as Susan. To conclude with the rich farce of "Raising the wind," in which Mr. Phelps will assume his old character of Joremy Diddler. Such a host of attractions must of themselves draw a full house, setting aside the popularity of the beneficiary. With the gallant sons of Neptuno Mr. Phelps has always been an especial favorite, and he thus humorously invites their attendance: Proclamation—All hands aloy! BARKERVILLE, Oct. 20.

Are still going on vigorously, the weather continuing to be most favorable to mining operations. Though I have no "big strikes" to record since my former letters, I am still happy to state that many companies are doing well, gold being washed out in larger quantities than a month ago. Fower miners are now idle on this creek than at any previous period. The gloom that overshadowed their brows after the Rood has faded away as a general thing, and the many cheerful faces show that the people are inclined to be in better spirits. MINING AND PROSPECTING three hours of eating the speaking began, and lasted for five mortal hours longer. The cliquette was entirely English, differing lasted for five mortal hours longer. The cliquette was entirely English, differing somewhat from ours. Her Majesty is never cheered, nor the toasts in her honor responded to by a speech. The President replies: "The Queen;" the Vice-President replies: "God bless her!" and her health is drank standing, in silence. When any profession—the bar, for example—is toasted, all its members rise and stand till the responses are ended. Speakers address both ends of the table: "Mr. President, Mr. Vice-President and gentlemen." Of course the English speeches were conversational—couched in the language of plain every day talk—though direct, pointed and sensible. And of course the Americans plunged into the profoundest abyss of rhetoric and soared to the empyrean of declamation. It was an admirable place for contrasting the two national styles. Once or twice ours ran into the ludicrously bombastic, but on the whole the contrast reconstition, and the work of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the transmitted of the companies are ground sluicing with the transmitted of the companies are ground sluicing with the transmitted of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided of the companies are ground sluicing with the decided o

all the companies are ground sluicing with the utmost vigor. I am informed that they are well rewarded for their labors. BELOW THE CANON the Chipps Co. are still washing tailings and seem well satisfied with the result.

The Foster Campbell Co. are sinking a new shaft which is already over 60 feet deep.

The Bald Head claim is not paying ex-

renses. The Sheepskin claim continues to

bastic, but on the whole the contrast recondiled me to the American mode, despite all the ridicule that has been heaped upon it. Vicious in grave discussion and parliamentary bodies, it is beyond question the most effective style for popular assemblies. It amazed and delighted the British audience—like the rest, a little the better for liquor—applauded to the echo. In wine is friendiness if not truth. We had not only the inevitable staple of such occasions about Shakspeare and Milton, a common language and a common lineage, but a very leading The Eagle claim is filled with water. and a common lineage, but a very leading British official even predicted that at some future day the two nations would be one—a The Hibernia Co. When we separated, at three in the morning, I think many of the guests were in doubt whether they lived under Queen Victoria or Andy Johnson. "Nothing succeeds like success." There was much Southern sympathy in Victoria; now, all are our dear frineds, our affectionate cousins, our admiring brethern. Johnny Reb has proved a bad failure, and Johnny Bull, who began by embracing him, ends with a parting kick. But let us be just; the British are no worse than in the bill.

The Welsh Co. are making above wages.
The Australian Co. washed up above 11 ounces the day before yesterday, but do not quite make expenses on the whole.

Previous to giving any, two or three days ago they washed up 35 ounces, but I do not think they now make over expenses. Almost the whole of the old company have sold out. A whole interest was knocked down at public auction in the early part of the week for the sum of \$400. At the commencement of the season the shares were disposed of at \$5000 and \$6000. Tempora Mutantur.

[Dispatches to the Oregonian.] By the arrival of the Active we have

rom which we obtain the following tele-

lead. They intend working during the whole winter. I wish them better auceess than they have had heretofore.

The Cariboo Co, were doing well when their claim got filled up again with water. This seems to be a most unfortunate company, still Lat from yielding to despondency, they are making the most strenuous exertions to get out the water again. Such persoverance and indomitable energy deserve to be crowned with final success.

The Aurora Co, washed up 71 ounces on Wednesday last.

All the side hill on their claim seems to slide by degrees into the creek and the timbers in their drift commence to yield to the external pressure, which makes the work now a most dangerous piece of business to the hands. New timbers are put in day and night and are now so thick that it is impossible to go through. But this seems to be on oavail. The claim has been drifted for nearly 300 feet in length and 103 feet in width. No such area of bed rock has yet been uncovered in Cariboo, and to make things worse and worse, it is adjoining the The Wake up Jake and Saw Mill claims, things worse and worse, it is adjoining the The Wake up Jake and Saw Mill claims, which are entirely drifted out, the latter being in a very poor condition. Owing to these circumstances, ere long, I am afraid it will be risking life to proceed with the work. Such being the case, some of the very richest ground will remain unworked, though blame is to be attached to no one for such an unfortunate result, the claim being one of the text timbered in the whole creek.

The Saw Mill claim, which has been very be badly timbered, commences to give way too, distributed among persons known to be opposed to the Fenians. The Custom authorities are nervous over the recent large importations of war munitions which it is believed will find their way in to the hands of the Feniaus. It is ru-mored that the present movements in Ireland are merely a ruse and a feint to cover the grand design, which is, when England has thrown her troops into that country, an armed force of the order on this side of the Atlantic shall seize Cana-ada, declare it an independent State and place it under the protection of the States.

U. S. RELATIONS WITH CHINA. New York, Oct. 22.—The approaching change in our relations with China is discussed with earnestness by the English press. The Shanghai correspondent of the London Times states that hitherto the American national representatives have been treated with ill-concealed dislike, and in some cases contempt. He attributes this fact partly to the absence of the American fleet in China waters, and partly to the habit of making consuls of missionaries. Now that a United States fleet is on the road to China, an extraordinary change is anticipated in the mutual diplomatic relations of the two countries of a private character.

Alexander II. Stephens called on the President this morning. The interview was of a private character. tries. The Times special asks whether the first introduction of the American fleet will not be of a hostile character The American citizen Burgveine, for whose restoration an imperative demand had been made by the United States Conginally from Davis, who it is said has de-

HURRICANE IN THE WEST INDIES. New YORK, Oct. 21.—Files of late West India papers furnish additional items of a terriffic hurricane which swept over some islands on the 6th of last month.

In Gaudaloupe it was particularly severe. Houses were lifted from the ground, torn n pieces and blown into fragments; to a considerable distance the air was filled with flying debris. In one town the hos-pital was blown down and all the inmates killed or wounded. Between 200 and 300 were killed. The crops of the Island were destroyed; scarcely a tree was left standing, and it is believed that many vessels were stranded or sunk.

A melancholy affair occurred in British Guiana on the 19th of last month, A

party of gentlemen left Georgetown on the 18th of September, to visit the penal settlement of the colony. On their return two boats, carrying a number of the ex-cursionists, undertook to go over the falls on Mozorm river. One of the boats went over in safety, but the other became unmanageable, and out of twelve persons on board, ten, including Captain Beresford the Governor's son-in-law were drowned. Especially is this the case along portions of the const upon the Sea Islands where negroes have been established on abandoned plantations, subject to the control of officers of the Freedman's Bureau. The planters who - now that the rebellion is crushed—are anxious to regain posses sion of these lands, allege that the freed men are allowing them to go to ruin-They do not raise enough for their own maintenance-are totally neglecting preparations for next year's crops, and refuse

Holloway's Pills are undeniably the finest medicine in the world for biliousness and indivestion. In all cases of deranged stomach, determination of blood to the head, bile, sick head-ache, liver, and stomach complaints, there is no medicine known that will give immediate relief as these renowned Pills; young and old, rich and poor, patronize them, and so many cures are effected by their use, that their praise is sounded from the torrid to the frigid zone; in truth, persons who tavel consider them a necessary requisite. In sultry weather or warm climates, or in India, the blood becomes overheated, the liver torpid, the skin covered with prickly heat, and the whole system languad and exhausted. Nothing so soon gives relief as Holloway's Pills. HOLLOWAY'S PILLS are undeniably the finest

ing so soon gives relief as Holloway's Pills.

Holloway's Olnyment and Pills are an infaliable renealy for bad legs, and all kinds of wounds. The surprising sale or these invaluable medicines, in every part of the civilized world, is the most coavineing proof of their efficacy. They speedily cure bad less, old wounds, scroidla, and diseases of the skin. Thousands of persons suffering from these dreadful maladies have been cured by these medicaments, after every other means had failed; and it is a fact, beyond all doubt, that here is no case, however obstinate, or nowever long standing, but may be quickly relieved; and ultimately cured, by these wonderful medicines. Their united action is irresistible, Moren need onto be said in their prisise. Let those who doubt their excellence give them a call.

Holloway's Oistment and Pills—These potent remedies constitute a materia medica in themselves, for there is no internal or external disorder cont. oilable by medicine for which the one or the other of them is not a positive remedy—eruptions, tumors, scrofula, scurvy, cancer, asthma, rheumstism, gout, and drops entirely subside and disappear under the action of these joint medicines; and in eases of indigestion, sick headache, bile, liver complaints, debility, and other disorders originating in the internal organs, the Pills produce the most astousning results maginable. The student of Nature knows how simple are her ways; if one preparation can throw out all the impurities of the blood, disease is conquered and art is triumphant, because it adopted the simplicity of Nature.

HOLLOWAY'S PILLS-Liver Co. wirtue of these incomparable Pills are fully preciated in every part of the civilized world, they act on the general system through the c lation, there are few diseases which they ca preciated in every part of the exilized world. A they act on the general system through the circulation, there are few diseases which they canno cure; but they are especially efficacious in all the disorders of the liver. For those they are as indubitable specific. They possess unrivalled potency for good, while they cannot do harm. I child might physic itself with these Pills, and without the slightest danger, except from such excess as would make the most wholesome aliment in the world an evil. By reducing the superduous bile, regulating its due secretion, and giving tone to the stomach, they effect a permanen and perfect cure.

In Holloway's unrivalled Ointment and Pills' the dropsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quick, and perseverance in the steady application of this noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with succeeding the description of the content of the steady of the description of the present of the remedies and absorbent system, that the dropsical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns.

Persons suffering from these scourges of the human frame should arrest their progress at once, for it is both insidious and rapid. Fistulas, if long allowed to go on unchecked, not only weaken the nervous system, but destroy life. The sooner these inestimable remedies are used the more certain is success; yet none should despair, hopeless cases have often yielded, and the sufferer has been sayed a painful death. In executations, a few applications of this healing Ointment effect a cure, while the Pills, conjointly used, are especially beneficial in relaxing and removing strictures, whatever their situation or duration.

Holloway's Ointment and Pills, a certain remedy for diseases of the skin—Ringworm, sourcy, scrofula, or king's evil, sore heads, and the most inveterate skin diseases to which the human race is subject, cannot be treated with a more safe and speedy remedy than Holloway's Ointment and Pills, which act so peculiarly on the constitution, and so purify the blood that those diseases are eradicated from the system, and a lasting cure is obtained. They are equally efficacious in the cure of tumours, burns, scalds, glanddlar swellings, ulecrous wounds, rheumanism, contracted and stiff joints. These medicines operate mildly and surely. The cure effected by them is not temporary or apparent only, but complete and permanent.

Holloway's Pills —No family should be without these pills.—Their long-tried efficacy in removing indigestion, stimulating the bowels, and purifying the blood, have secured them imperishable praise throughout the globe. Whatever the disease, a few doese will relieve the more urgent symptoms and thereafter completely control all disordered action, rouse the torpid liver, empty the engaged spleen, clense the obstructed kidneys, assimilate the food, improve the blood, and thereby confer on the brain and every function healthful vigour, natural activity, and wholesome regularity in cases of indigestion, dimness of sight, headache, mental and physical lassitude, these restorative Pills act as a charm. They expel rheumatism and gout, while they infallibly correct female complaints in young and old, delicate and robust.

HOLLOWAY'S OINTMENT AND PILLS-Acute

Holloways Pills.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tone to the stometh renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mind are succeeded by acheerful activity of the physical and mental functions. Indigestion is the parent of so many ovils, and is we common, so universal a complaint, that it is a great blessing that such a remedy as this invaluable medicine should have been discovered. No one need long suffer from indigession with these Pills at hand.

PILES, STRAINING AND TENEMUS.

Are the results of Inflammation or irritation of the mucous membrane of the bowels, induced by drastic pills—these impertee tips, indicated by the chile, are carried to the lower bowels, and induce a peritation movement or evacuation by their Irritation—hence the straining, cramps, wrenching pains, piles and tenesmus, and the frequent false calls to the water closet, that patients undergo who take these imperfect pills.

If you would avoid these annoyances, whenever a purgative medicine is required, take a desert pills.

THE WILL PURGE THOROUGHLY AND LEAVE THE BOWELS REGULAR.

Holloway's Cintment and Pills.—The family medical chest that is furnished with these powerful remedies needs nothing more. Indigestion, general dibility, liver complaint, eruptions, sores, wounds, ulcers, tumours, &c., are infalibly cured by their use. They purify the blood and give tone and vigour to the whole system. The Ointment, when well rubbed into the parts affected, enters the flesh just as salt enters meat, and if the Pills be taken as an auxiliary, one cure is speedy, thorough, and permanent. Those medicaments are composed of rare balsams, without the admixture of a grain of mercury or any injurious substance. They are peculiarly mild and gentle in their action, and are as safe as they are effections.

HOLLOWAY'S OINTMENT AND PILLS—Acute Rheumatism. In all aserer pains in the joint and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at ones to lessen inflammation, ease pain, reture the swelling, restore the free circulation, and expel the disease. In these complaints, indeed, Holloways Ointment and Pills are an infallible specific. The Ointment should be rubbed as ment the part in pain as the patient can bear; it is absorbed and directly conveyed to the diseased textures, when, acting on nerves, ressels, and guiders, it will arrest disease and again establish healthy action. The aperient and purifying qualities of the Pills have the happiest effect in assisting the Ointment.

Holloway's Pillsand Ointment—Stomach and Kidneys. Between these two organs there exists a close and intimate relation which is demonstrated by the wasting which occurs in all diseases afflicting the kidneys. The disordered stomach is often the first index of renal irregularity. Holloway's remedies used at that juncture would cut short many a serious and fatal attack. They act with wonderful efficacy on every organ of secretion, but especially do they regulate the stomach, liver and kidneys, in restoring their healthy functions, and casting out any obstructions or impurities. It is necessary for the ointment to be well rubbed into the small of the back twice daily, when it is absorbed, and greatly augments the purifying and salutary influence of the Pills.
